

The Norwegians will manufacture devices in Žepče for export to the European and Asian markets
9/14/2023 2:29:45 AM

For many years, they have had a production facility in the Polja industrial zone in Žepče and are known for their revolutionary project and patent in the oil and gas sector, whose production is carried out in the Polja industrial zone on 2,400 square meters.

On this occasion, a meeting was held with representatives of the Municipality, where the director of Eagle Technology in Žepče Ivo Klarič officially announced the expansion of the production capacity of this factory.

They started working in Žepče as an engineering office with 4 employees, and in 2019 they finished the construction of the factory, which started working with 30 workers. Today they have 115 employees, and they plan to expand in the coming months when they plan to hire another 30 workers.

The Eagle Technology company built a new production part within the existing factory in order to provide production space for the plastic recycling plant.
