

TECHNICAL RUBBER GOODS “FAGUM NOVI”, ZVORNIK

Project title	Production diversification of technical rubber goods and investing in new technologies
Sector	Technical rubber goods
Location	Zvornik, Bosnia and Herzegovina
Location description	The company is located in Karakaj, city of Zvornik, Bosnia and Herzegovina next to the main road route Sarajevo-Bijeljina. The distance from the town of Zvornik is 3 km, from the border crossing with Serbia for passengers and freight traffic in Karakaj 0.4 km, and from a main rail station in Zvornik 0.8 km. Distance of the company to Sarajevo is 124 km, distance to Belgrade in Serbia is 169km, distance from the nearest international airport in Tuzla is 40 km.
Company description/ Project background	<p>Fagum Novi was established in 2011 as a family business and basic activity of the company covers production of rubber products. This production program represents continuation of the activities of AD Fagum Zvornik with a long tradition that started back in 1963.</p> <p>At the moment most of the production of „Fagum Novi“ is based on the following three production programs:</p> <ol style="list-style-type: none"> 1. Fagum Novi program for mining industry <p>This includes manufacturing of components made of rubber and in rubber-metal combination for abrasion and corrosion protection of machines, devices and equipment in mines, flotations and separations:</p> <ul style="list-style-type: none"> - Rubber linings for flotation mills, - Rotating and stationary rubber components of flotating subaeration machinery and attrition machinery, - Rotating and stationary rubber components of horizontal and vertical pumps for hydromixture transportation, - Rubberized replaceable components of hydrocyclones for classification and concentration of hydromixtures, - Rubberizing of valves for hydromixture transportation systems, - Rubberized reinforced pipes with steel flanges for hydromixture transportation - Protection with rubber-metal plates of bin discharge points and other surfaces exposed to intensive abrasion, - manufacturing of rubber grids and sieves and more.

	<p>2. Fagum Novi program for shipping industry</p> <p>Fagum Novi deals with elastic protection of harbours and floating crafts. This includes manufacturing of components made of rubber and in rubber-metal combination, such as:</p> <ul style="list-style-type: none"> - Harbour and ship rubber bumpers for absorption of kinetic energy in the ship harbouring stage, - ring, cylindrical, semi-cylindrical and trapezoid rubber bumpers, - rubber fenders of ring, cylindrical, prismatic (open and closed type) shape, and hand cylindrical fenders for floating crafts, - rubberizing of bearings for shafts of marine propellers, - special rubber bumpers at customers' request. <p>3. Rubber shock absorbers of various types:</p> <ul style="list-style-type: none"> - Rubber shock absorbers in combination rubber-metal for aggregates that produce large vibrations - Rubber shock absorbers for vibrating add machines - Rubber shock absorbers for softening metal vibrations on ships with double bottom - Rubber shock absorbers beneath the truck cabin and other types of rubber shock absorbers of different shapes and purposes 	
Project status	Pre -feasibility study	
Project description	Starting a new production program for technical rubber goods used in the auto industry	
Estimated total investment cost	1,580,653 EUR	
Inputs provided by local partner	Value	Description
	550,000 EUR	<ul style="list-style-type: none"> - Preparation of feasibility study (in progress) - Land plot of 9,000 m² owned by "Fagum Novi" - Production plant of 2,600m² owned by "Fagum Novi" - Equipment can be used for new production program - Skilled workforce and municipality's incentives for new employees
Inputs required from foreign partner	Value	Description
	1,030,653 EUR	<ul style="list-style-type: none"> - Providing of all equipment and tools for production - Or other equipment by the proposal of foreign investor in the rubber industry
Form of cooperation with foreign partner	Financial	Technical
	<ul style="list-style-type: none"> - Joint venture, - Equity participation 	<ul style="list-style-type: none"> - Management expertise - Technical expertise - Marketing expertise - Access to technology, equipment etc. - Access to markets and distribution channels, etc.
