

CUBIC STYLE – RENEWABLE ENERGY SELF-SUSTAINABLE OUTDOOR KIOSK

	CUBIC Style – Ecological Self Sustainable Hi-Tech Solar Outdoor City Kiosk
Sector	Energy Sector Project
Location	Sarajevo, Bosnia-Herzegovina New production facility supposed to be built according to mutual agreement with potential investor, most preferably in one of the industrial zones within Sarajevo Canton.
Project background	Elding Company is originally established in 1990 and worked intensively on several industrial design projects: <ol style="list-style-type: none"> 1. Proposition for a innovative telephone booth with interactive infotainment displays, 2. Implementation of futuristic UFO-shaped outdoor kiosk, 3. Advanced ideation of the first electric supercar, etc... Since company's re-registration in 2001, the company has been occupied with

	<p>authorised import of textile raw materials for domestic producers, as well as periodical visualisations and illustrated propositions of new, ergonomic and ecological products, objects and vehicles...</p> <p>The company is ready to dedicate ourselves to the adaptation and transformation of its business, which would include full engagement in the direction of successful implementation and realization of the intention to start medium-scale production of universal CUBIC Style ecological mini-objects, solar outdoor kiosks.</p> <p>The construction of a compact production facility is planned, so the employment opportunities for professional staff and labour force will gradually increase. Beside domestic market, kiosks are intended to be offered in all Balkan states and other foreign countries, with an emphasis on the EU. Top export quality of the product is mandatory and the initial focus is entirely on prototype testing.</p> <p>Based on the projected statements, in the first year of gradual development of the production plant, an initial series of approximately 10 solo units is expected, after which a production line would provide the possibility of one copy per week in the coming years. Revenues would track sales successes, and all profits would initially be reinvested in new innovative projects of our futuristic industrial designs.</p>	
Project status	<p>Prototype construction finished, the continuation of works implies a new business partnership. Additionally, in parallel with CUBIC Style Kiosk project, company is further available for R&D of other various futuristic innovations...</p>	
Innovation description	<p>A modern, universal, ecological and modular kiosk, equipped with 12 solar panels, Ready-To-Use (instant start of small business), intended for urban, busy street corners, wide pavements and city squares, as well as for little towns, beaches, resorts, airports, train stations, and for any other suitable place where usability of such little object could improve general life quality of outdoors.</p> <p>It is primarily imagined and formed from a cubic shape, then, specifically rounded so that can be easily joined if larger interior space is necessary. Number of connections is unlimited, but it is expected the most common use of solo version, as well as double-and triple-release. Our CUBIC Style Kiosk model is truly unique and original futuristic approach to responsible and ecological lifestyle, due to advantage of renewable energy solar system.</p>	
Estimated total investment cost	270.000 EUR	
Inputs provided by local partner	Value	Description
	20.000 EUR	The initial investment implied: Original project, complete industrial design, R&D, patent protection and business plan. Fabrication of prototype construction.
Inputs required from foreign partner	Value	Description
	250.000 EUR	Building a compact production facility and organizing the start of production, including necessary equipment, materials and employment of additional workers.
Form of cooperation with foreign partner	Financial	Technical
	Long term joint venture, acquisition or redemption of complete project with prototype in progress...
